

Your Checks Are In The Mail - Guaranteed TM

So how does a service with Free sign up... No set up fees... No minimum monthly volumes...No long term contracts... sound to you??

At EZPay Services- our motto is *simple*. We either earn your business or you go some where else...and our customers *LOVE* us!

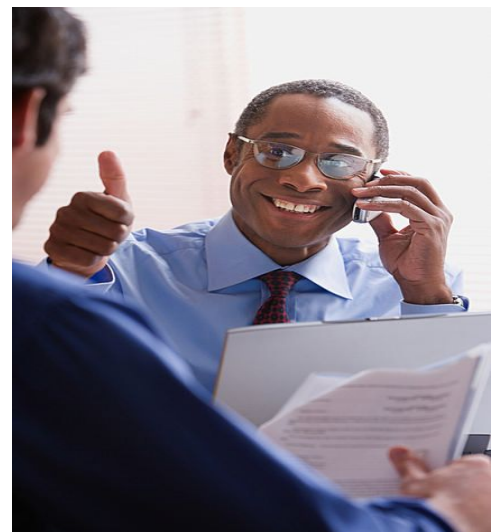

What's our formula for success?

Here at EZPay Services Service, we like helping companies just like yours save essential time and resources. If you have a business... you have a vision. Why spend time worrying about printing, billing and processing payments when you can trust EZPay Services to handle all of it for you?

EZPay Services is dedicated to helping you create a way to handle your billing and payment processing services. We provide unique and powerful solutions for financial institutions, third party processors, software developers, and corporations of all sizes. EZPay Services has even been appointed the official document printer for the Federal Bureau of Finance with responsibilities including data security, check issuance, postal deliver, real-time tracking, and reporting of the agency's payments.

Simply put, we are the best choice for outsourced check printing and mailing services.

Are we claiming too much?

We don't think so.

Check Printing, Mailing & Payment Processing Solutions

In today's busy **business world**, every company needs our services. EZPay Services is one of the payment industries most recognized brands. We are a small, privately held Washington corporation with a small but dedicated and highly trained staff which ensures personal detail and attention. We are in the business of saving other businesses' money and time and we pride ourselves on being the most secure printing and mailing option available.

Our core service is printing, mailing and tracking checks for companies.

Our competitive advantage is our ability to accept data and print in near-real time via XML; track the checks all the way through the process including delivery (like UPS) and our ability to create custom on demand printing.

We print everything from account payable to rebates and commissions.

You can rest assured that with EZPay Services, you get knowledge from an experienced 'payment processor' and not a printer. Our competitors are printers... they do not know anything about security, Internet risks, real time processing, real time tracking or secure data storage.

We also have the remarkable ability to offer our clients any type of report, delivered anyway that they need it. So, the CFO could get a daily fax containing info that is important to him and the accounts payable person could get a data file for importing into their accounting system.

Yes, it is that simple! Sounds great doesn't it??

Our service can be added to thousands of software applications in thousands of industries. Accounts payable, dividends, rebates, commission/ affiliates, payroll...and the list goes on. Over 86% of all payments made by businesses are made by check. That makes for a huge opportunity not only for us but for companies to save millions of dollars. It costs the average company over 5.00 to print and mail a check;

some even as high as 25.00. Our service is under a buck WITH postage.
Why wouldn't you choose EZPay Services?

Our Mission

...Focused, yet Fluid...Detail-Oriented...Innovative...

EZPay Services was originally created to offer a solution to a traditionally underserved market; an easy to use payment service for small and mid-sized companies. In March of 2006, Mr. Ronald Ehli joined as CEO of EZPay Services. "As businesses of all sizes become aware of the advantages to outsourcing their check writing process they will turn to us, the leaders of real-time processing," states Ehli.

EZPay Services is dedicated in broadening their customer base and making this revolutionary new technology a standard for business. Ehli adds, "Our goal is to become the defacto real-time outsourced check writing and mailing service used by companies of all sizes *internationally*."

The fact of the matter here is that ... If you can send checks from anywhere, you can truly do business from anywhere.....

Going GREEN

Committed to social responsibility as a consumer and a service provider, EZPay Services is a proud member of the EPA Green Power Partnership and powers both corporate offices and its national secure check-issuing facilities with 100% renewable wind power.

Why Choose EZPay Services as your designated solution?

This is an easy answer.... Work smarter, not harder. Better your life through innovation. You're highly selective with who you work with. You're even choosier with the companies you partner with. But EZPay Services is one

you will be glad to rendezvous with! We offer you a huge cost savings and highly customizable checks so you can keep your branding. EZPay Services is excited and proud to continually strive to always give you a competitive advantage, and help you do what you do best...run your business.
