

A little over 2 years ago, my fellow watch enthusiast and collector and I set out to find a reasonably priced men's AUTOMATIC MECHANICAL WRISTWATCH. (Non Quartz)

Most of the quality mechanical automatics are quite expensive, ranging anywhere from \$600 even thousands of dollars. We stumbled across some that weren't as stylish and other less expensive wristwatches, but they simply were not high quality.

From our extensive research experience, we highly recommend staying away from the low quality ones!

A reflection of our times; as well as yours.

Up until to now you had to buy an expensive automatic mechanical to get decent quality. But not anymore!

You have found us!

May we proudly introduce you to...
